- 10

Explanation of the symbols on the device

Warning: To reduce the risk of electric shock, do not remove cover (or back). No user-serviceable parts inside. Refer servicing to qualified service personnel.

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

AC POWER

IMPORTANT NOTES

- Make sure the power supply is correct and never handle the power cord or its plug with wet hands when plugging into, or unplugging from an outlet.
- Ensure that the main power switch is in the "OFF" position before connecting to AC power cord to the power supply to avoid damage to the unit.
- A damaged power cord can easily cause an electric shock or fire hazard, never use a power cord after it has been damaged.

Life's too short for "ok". Too short to have stuff in our lives that's "ok, I guess". "But-I'm-almost-home!" battery life. "But-it-only-fell-off-the-table" build quality. "Has-someone-stolen-the-bass?" sound quality.

We say NO to "ok". In 2021, we set out to make stuff that's better in little ways that make a big difference.

Stuff for people who expect more. Who want the songs to keep playing until they're home. Who are on a mission to stay up all night. Who want to know they'll feel great and look awesome, every day.

For people who want every day to be a 'wow' day.
